

IT audit and advisory

Service capability profile

Manage risk and reduce the threat to your business

Businesses are facing increased risk and compliance demands related to Information Technology (IT) - from investment decisions, standardization of infrastructure and services, automation / business transformation initiatives, to a shortage of skilled resources.

IT is an integral part of any organization and plays a vital role in both private and public organisations. In the aftermath of the pandemic, the value of leading-edge technology became evident as businesses and government entities increased investments in Cloud solutions and collaboration tools to ensure that their employees could remain connected, and to optimally service their clients. With the increase in the use of IT, the associated complexities and risks have increased too.

Minimize risk, maximize predictability and execution

To fully understand and effectively act on the range of risks across your company, you need to rely on comprehensive skills and experience with access to the latest knowledge and leading practices. We help our clients understand their IT risks, and we assist in addressing risk in both proactive and responsive contexts. We deploy our diverse pool of controls professionals, compliance specialists, security professionals, and risk consultants with industry depth to meet the complex requirements of our clients. We

work with our clients to provide the optimal team and resource structure to accelerate program execution. Our goal is to ensure we start with the benefits-realization objective to drive the most effective and value-enhancing engagement model for our clients.

Our clients choose Grant Thornton because:

- they receive the best of both worlds: global coverage through our international network and an agile and flexible service delivery by our local experts and specialist technical partners, responsive to the needs of individual organisations.
- they receive advice from a team who have deep technical expertise with a robust, commercial outlook. We understand that IT underpins an organization's ability to run operations efficiently, without exposure to unacceptable and unnecessary risk.

Prepare, protect, react and change

We help our clients prepare themselves for IT related risks, ensure ongoing protection, react effectively and drive change to improve their organizational capability.

IT Audit

We help our clients to understand how well they are mitigating their technology risks, through thorough audits and assessment. These services include:

- IT general controls reviews
- Application controls reviews / pre and post implementation reviews
